

## Written Calculation Policy—Addition

1. Lay grid out as shown, using Diennes in two rows and hundreds, tens and ones columns e.g.  $176 + 298$

2. There are 14 ones. Regroup 10 and move them into the tens column. There are now 4 ones.

3. There are now 17 tens, regroup 10 of them into a 100 and move into the hundreds column. There are now 7 tens and 4 hundreds.

*Use the pictorial alongside the formal method to bridge children's understanding of how the formal method works.*

Addition  $176 + 298$

H	T	O
1	7	6
2	9	8
4	7	4

Each TEN is regrouped to the next column because each column is 10x bigger.
